PRAŽSKÁ BOTANICKÁ ZAHRADA V TROJI
CZECHOSLOVAKIA

SITUS GEOGRAPHICUS HORTI

50° 07' latitudinis
14° 24' longitudinis

Altitudo supra mare : 180 - 290 m

PROPRIETATES CLIMATICI

T - media temperatura aeris interdiu
2m supra solum
Tmin - media temperatura minima aeris
interdiu 2m supra solum
Tmax - media temperatura maxima aeris
interdiu 2m supra solum
Tmin,s - media temperatura aeris interdiu
5 cm supra solum
R - media supra pluviarum niviarumque
aquae
S - media summa horarum luminis soli
H - media humiditas aeris 2 m supra
solum

| | T (°C) | Tmin (°C) | Tmax (°C) | Tmin,s (°C) | R (mm) | S (h) | H (%) |
|------|-----------|--------------|--------------|----------------|-----------|----------|----------|

Semina collecta anno 1992

DESIDERATA :

Director horti: ing. Evžen Pechman

Semina plantarum spontanearum in locis
natalibus collecta (seminum collectores):

A - Hortus botanicus

(RNDr. Pavel Sekerka)

B - Volduchy - Rokycany

(RNDr. Pavel Sekerka)

C - Tachov (ing. Václav Kadlec)

Semina plantarum cultarum
(seminum collectores) :

D - Hortus botanicus (RNDr. Vladimír Huml)

E - Hortus botanicus (RNDr. Pavel Sekerka)

F - Hortus botanicus (ing. Petr Kosina)

G - Hortus botanicus (Jiří Novák)

H - Hortus botanicus - Teplice

(Věra Michálková, Šarka Zeithammerová)

I - Plzeň (RNDr. Pavel Slabý)

J - Tachov (ing. Václav Kadlec)
